

Curriculum Vita

Akbar Eslami

Current Academic position Professor of Environmental Health Engineering

International Researcher ID: J-1191-2017

Scopus Author ID: 36023594300

Personal details

First name	Akbar
Last name	Eslami
Work Address	Department of Environmental Health Engineering School of Public Health and Safety Shahid Beheshti University of Medical Sciences P.O. Box 198353551, Tehran, Iran
Telephone	+98 21 22432040
Fax	+98 21 22432037
Email	aeslami@sbmu.ac.ir ; akbar.eslami@gmail.com

Date of Birth: 23 Sep. 1974

Educational Background

PhD Environmental Health, Department of Environmental Health Engineering, School of Public Health, Tehran University of Medical Sciences, **2007**.

Dissertation: Survey on The Potential of Photocatalytic Processes for Degradation of MTBE in Contaminated Waters

MSc Environmental Health Engineering, Department of Environmental Health Engineering, School of Public Health, Tehran University of Medical Sciences, **2000**.

Thesis: Study on Iron and Manganese Removal Efficiency from Groundwater Resources by Aeration-Filtration

BSc Environmental Health, Department of Environmental Health Engineering, School of Public Health, Shahid Beheshti University of Medical Sciences, **1998**.

Major Professional Experiences

Research Experience

Water Quality Assessment
Advanced Water and Wastewater Treatment Methods
Municipal, Industrial and Health Care Waste Management
Environmental Radiation Monitoring

Teaching Experience

Environmental Chemistry
Environmental Microbiology
Environmental Toxicology
Environmental Behavior of Pollutants
Environmental Biotechnology
Water Quality and Treatment
Industrial and Municipal Wastewater Treatment
Advanced Instrumental Analysis for Environmental Pollutants
Environmental Epidemiology
Environmental Radiation

Research Interests

Wastewater: Treatability of Industrial Wastewater Treatment, Environmental Biotechnology, Municipal Wastewater Reuse
Water: Water Quality Assessment, Advanced Treatment Methods
Waste: Industrial Waste Disposal, Vermicomposting
Radiation: Environmental Radioactive Releases Monitoring, Background Monitoring

Peer-Reviewed Papers

A) Papers published in English language

- 124 . Nasim Naeji, Mohammad Rafieea, Hamed Azizi, Marjan Hashemi, **Akbar Eslami** "*Data on the microplastics contamination in water and sediments along the Haraz River estuary, Iran*", **Data in Brief**, (32) 106155, 2020.
11. Mansour Sarafraz, Mostafa M Amini, Moayed Adiban, **Akbar Eslami** "*Facile synthesis of mesoporous black N–TiO₂ photocatalyst for efficient charge separation and the visible-driven photocatalytic mechanism of ibuprofen degradation*", **Materials Science in Semiconductor Processing**, 120 (105258), 2020.
9. Mahsa Moradi, **Akbar Eslami** "*Reductive/oxidative degradation of tetrachloroethene and its transformation products using combination of permeable ZVI column and UV/Fe/peroxydisulfate system: RSM design and synergy effect study*", **Journal of Water Process Engineering**, 36 (101288), 2020.
7. Fatemeh Shokri Dariyan, **Akbar Eslami**, Ehsan Aghayani, Mojtaba Pourakbar, Ali Oghazyan "*Comparison of artificial neural network and multi-kinetic models to predict optimum retention time for dairy wastewater treatment in the integrated fixed-film activated sludge*", **International Journal of Environmental Analytical Chemistry**, 2020.
5. Anoushiravan Mohseni Bandpi, **Akbar Eslami**, Mansour Ghaderpoori, Abbas Shahsavani, Ali Akbar Mohammadi, Maryam Morovati, Yousef Gholampoor, Ali Khani Jeihooni, Afshin Ghaderpoury, Iman Parseh, Abdolazim Alinejad, Shahram Sadeghi "*Characteristics and sources of water-soluble ionic associated with PM_{2.5} particles and cytotoxicity effects using MTT assay in Tehran, Iran*", **Urban Climate**, 32 (100612), 2020.
3. Fatemeh Amereh, Mohammad Babaei, **Akbar Eslami**, Simin Fazelipour, Mohammad Rafiee "*The emerging risk of exposure to nano (micro) plastics on endocrine disturbance and*

reproductive toxicity: From a hypothetical scenario to a global public health challenge" **Environmental Pollution**, 261 (114158), 2020.

Phosphorous and Nitrogen Removal from Municipal Wastewater by: Richard Sedlak,
Translated By: A.R. Yazdanbakhsh, **A. Eslami**, E. Bazrafshan, and G. Ghanizadeh

International Conference Presentations

1. "Photocatalytic degradation of methyl tert-butyl ether (MTBE) from contaminated water: complete mineralization", **The Third International Meeting on Environmental Biotechnology and Engineering (3IMEBE)**, 21-25 September 2008, Palma de Mallorca, Spain – *Oral presentation*
2. "Survey of Fluoride Concentration in Drinking Water Sources and Prevalence of DMFT in the 12 Years Old Students in Zanzan, Iran", **XXVIIth conference of the International Society for Fluoride Research (ISFR)**, 9-12 October 2007, Beijing, China – *Poster presentation*
3. "Heavy metals in edible green vegetables grown along the sites of the Zanzanrood river in Zanzan, Iran: Implications for human health", **5th European Congress on Tropical Medicine and International Health**, May 24–28, 2007, Amsterdam, **The Netherlands** – *Oral presentation*
4. "Assessment of gamma background radiation in different seasons in Zanzan", **International Conference on Environmental Radioactivity: From Measurements and Assessments to Regulation**, 23 – 27 April 2007, Vienna, **Austria** – *Poster presentation*

Dissertation Supervisor

1. The feasibility study on the application of micellar-enhanced ultrafiltration process for concentrating of Gold and removal of brominated flame retardant (BFR) from leachate resulting from waste printed circuit boards of discarded mobile phones (To receive PhD in Environmental Health).
2. Study on efficiency of PES hollow fiber ultrafiltration membrane modified with black $\text{Ti}^{3+}/\text{N-TiO}_2$ nanophotocatalyst under visible-light irradiation for removal of ciprofloxacin from aqueous solutions (To receive PhD in Environmental Health).
3. Efficiency of MBBR reactor bioaugmented with gene cloning of Mn peroxidase in *Pseudomonas* for removal of diazinon from wastewater (To receive MSC in Environmental Health Engineering).
4. Optimization of persulfate activation process by simultaneously ultraviolet irradiation and ultrasonic for degradation and ecological toxicity reduction of trichlorethylene (TCE) in the aquatic solutions by response surface methodology (RSM) analysis (To receive PhD in Environmental Health).
5. Survey of microplastics pollution in water and sediments in the estuarine of Haraz River (To receive MSC in Environmental Health Engineering).
6. Modeling of photocatalytic process using nanocomposite Fe / Ag-ZnO with LED irradiation for removal of phthalates (DEHP and DBP) from aqueous solution- Case study , leachate treatment plant effluent in Aradkoh landfill (To receive PhD in Environmental Health).
7. Assessment of Outdoor Background Gamma Radiation in Tehran in winter and spring – 2016 (To receive MSC in Environmental Health Engineering).
8. Assessment Of safety in Drinking Water Supply System of Birjand City Using World Health Organization's Water Safety Plan, Based On Risk Management Approach (To receive MSC in Environmental Health Engineering).
9. Study on removal of non-steroidal anti-inflammatory drugs (Ibuprofen and Naproxen) from water by nano-photocatalytic process using N-S co-doped TiO_2 under simulated solar irradiation (To receive PhD in Environmental Health).
10. Investigation of effective parameters on performance of electro-fenton process using cathode electrode based on nanographene for the treatment of Yazdbaf factory textile wastewater containing mixture of dyes (To receive MSC in Environmental Health Engineering).
11. Evaluation of sludge toxicity in Tehran water treatment plants using bioassays (To receive MSC in Environmental Health Engineering).
12. Survey of natural radionuclide concentrations such as U-238 ,Th-232 ,Ra-226 , Ra-228 ,Pb-210 ,Po-210 and K-40 in bottled mineral waters of Iran-2014 (To receive MSC in Environmental Health Engineering).
13. Investigation of 4-chlorophenol removal efficiency from aqueous solution using graphene oxide nanopowder by continuous fixed bed adsorption (To receive MSC in Environmental Health Engineering).

14. An investigation into the remediation efficiency of Tetrachloroethylene contaminated water using Permeable Reactive Barrier (PRB) technology (To receive MSC in Environmental Health Engineering).
15. Survey of effective parameters on the combined sonoelectrochemical process efficiency for treatment of textile wastewater containing reactive dye in Yazdbaf factory (To receive MSC in Environmental Health Engineering).
16. Comparative survey of nitrate removal from drinking water using modified natural clays (To receive MSC in Environmental Health Engineering).
17. Process optimization of electrochemically generated Fenton's reagent using graphite and platinum electrodes for COD and acidic dye removal from textile wastewater (To receive MSC in Environmental Health Engineering).
18. Study on the efficiency of modified nanoporous graphene adsorbent for removal of 4-chlorophenol from aqueous solution (To receive MSC in Environmental Health Engineering).
19. Oxidative degradation of dioctyl phthalate (DOP) by photochemically-enhanced Fenton reaction in petrochemical wastewater plant (To receive MSC in Environmental Engineering).

Dissertation Advisor

1. Investigation of removal of persistent chlorine pollutants from industrial waste using planetary Ball mill and the possibility of simultaneous production of nanocomposites (To receive PhD in Environmental Health).
2. Efficacy study of integrated nano-sono-photocatalytic with visible light (VL/US/CuFe₂O₄) on the degradation of Atenolol from Aqueous Solutions (To receive PhD in Environmental Health).
3. Kinetic and deterministic investigation of the inhibitory effects of Cefixime on microbial growth and organic matters removal and Nitrification in a sequencing batch moving bed biofilm reactor (To receive PhD in Environmental Health).
4. Investigation of Cefixime and Ibuprofen drugs removal efficiency from aqueous solution using surface functionalized silica aerogel derived from pumice by continuous fixed bed adsorption (To receive PhD in Environmental Health).
5. Bioremediation of soil contaminated with pyrene by bio-augmented with gene cloning of Mn peroxidase in Pseudomonas (To receive MSC in Environmental Health Engineering).
6. Investigation of biodegradability enhancement of wastewater containing 2,4,6-trichlorophenol using UV/SO₃²⁻ advanced reduction process (To receive PhD in Environmental Health).
7. Evaluation of polystyrene nanoplastics effects on endocrine system in animal model (To receive MSC in Environmental Health Engineering).

8. Feasibility of biodiesel production from waste frying oil restaurant using: furnace and converter steel slag industry as heterogeneous catalyst (To receive MSC in Environmental Health Engineering).
9. Investigation of combined coagulation and ozonation process efficiency for turbidity, COD, color removal as well as toxicity reduction of dyeing effluent in a carpet factory (To receive MSC in Environmental Health Engineering).
10. Study on efficiency of carboneus absorbent derived from orange tree wood waste for removal of Tetracycline in aqueous solutions (To receive MSC in Environmental Health Engineering).
11. Investigate the efficiency of polymer nanocomposites synthesis with poly acrylonitrile activated carbon and carbon nanotubes removal of BOD, COD, TDS, TSS, Total Coliform, Fecal Coliform and detergents for recycling gray water (To receive PhD in Environmental Health).
12. Feasibility study for recycling and stabilization of sludge by aerobic digestion in Alborz Industrial City's wastewater treatment plant (To receive MSC in Environmental Health Engineering).
13. Investigation of Quality Characteristics and Treatability of surface run off in Tehran's FiroozAbad Channel for Irrigation uses in 2015 (To receive MSC in Environmental Health Engineering).
14. Investigation of diazinon adsorption from aquatic solution by Fe_3O_4 magnetic multi wall carbon nanotube (MWCNTs) (To receive MSC in Environmental Health Engineering).
15. Evaluation of iron oxide nanoparticles loaded on clinoptilolite in the advanced treatment of effluent of wastewater treatment plant (To receive MSC in Environmental Health Engineering).
16. A Comparative study on the capability of modified zeolite with Fe and KMnO_4 for removal Fe^{2+} and Mn^{2+} from water (To receive MSC in Environmental Health Engineering).
17. Study on the efficiency of ozonation for wastewater advanced treatment in molasses-based alcohol distilleries by spiral high pressure super mixing reactor (S2MXR) (To receive MSC in Environmental Health Engineering).
18. Investigation of sewer utilization on the nitrate concentration trends in Qazvin ground water resources (To receive MSC in Environmental Health Engineering).
19. Study on performance of aerobic sequencing batch bioreactor with clinoptilolite media to remove formaldehyde from wastewater (To receive MSC in Environmental Health Engineering).
20. Survey of saline and brackish waters desalination by carbon aerogel method and comparing with electrolysis method (To receive MSC in Environmental Health Engineering).
21. Study on the efficiency of olive mill wastewater (OMWW) treatment using integrated coagulation, acid cracking and Fenton-like oxidation processes (To receive MSC in Environmental Health Engineering).
22. Study on the effect of natural clinoptilolite on vermicompost quality produced from food waste (To receive MSC in Environmental Health Engineering).

23. Assessment of Fenton, photo-Fenton and modified Fenton in municipal landfill leachate treatment (To receive MSC in Environmental Health Engineering).
24. Optimization of net work solid waste collection and transferring system in Zanjan with utilizing suitable mathematical model and GIS (To receive MSC in Environmental Engineering).

Research Projects

1. The feasibility study on the application of micellar-enhanced ultrafiltration process for concentrating of Gold and removal of brominated flame retardant (BFR) from leachate resulting from discarded mobile phones
2. Occurrence of microplastics in the influent, effluent and sludge of south wastewater treatment plant of Tehran
3. Modeling and optimization of photocatalytic degradation of ibuprofen with black Ti₃+N-TiO₂ nanophotocatalyst under visible-light irradiation from aqueous solutions
4. Study on efficiency of PES hollow fiber ultrafiltration membrane modified with black Ti₃+N-TiO₂ nanophotocatalyst under visible-light irradiation for removal of ciprofloxacin from aqueous solutions
5. The study on the efficiency of Peroxymonosulfate/UV/MnO₂ nanoparticles for 4-Chlorophenol removal
6. Study on efficiency of modified nano silicate adsorbent for removal of pharmaceuticals from aqueous solutions - A case study acetaminophen
7. Effect of organic loading rate on performance, operation parameters and sludge yield in the FBBSBR and FBBSCR using for municipal wastewater treatment: modeling and optimization, 2017.
8. Survey of microplastics pollution in water and sediments in the estuarine of Haraz River
9. Assessment of Indoor Background Gamma Radiation in Tehran in winter and spring 2017.
10. Study on removal of Diclofenac by combined Ozonation/Persulfate process from aqueous solutions, 2017.
11. Investigation of removal efficiency of Cationic dyes (Methylene blue and Rhodamine B) from aqueous solutions by nano silicate adsorbent, 2016.
12. A study on combination of Permeable Reactive Barrier (PRB) and sulfate radical-based advanced oxidation process for the treatment of perchloroethylene-polluted water, 2016.
13. Modeling of photocatalytic process using nanocomposite Fe / Ag-ZnO with LED irradiation for removal of phthalates (DEHP and DBP) from aqueous solution - A case study leachate treatment plant effluent in Aradkoh landfill, 2017.
14. Assessment of Outdoor Background Gamma Radiation in Tehran in winter and spring – 2016.

15. Catalytic Ozonation Efficiency of Magnetic MgFe₂O₄ Nano-particles for removal of 4-chlorophenol from aqueous environments, 2016.
16. Modeling of optimized process of ultrasonic and Ag activated persulfate using Response Surface Methodology (RSM) for removing of amoxicillin from aqueous solutions, 2016.
17. Study on removal of non-steroidal anti-inflammatory drugs (Ibuprofen and Naproxen) from water by nano-photocatalytic process using N-S co-doped TiO₂ under simulated solar irradiation, 2016.
18. Assessment Of safety in Drinking Water Supply System of Birjand City Using World Health Organization's Water Safety Plan, Based On Risk Management Approach, 2015.
19. Study on removal of the Tetracycline by advanced oxidation process based on the sulfate radical (SR-AOPs) in the aqueous solutions, 2015.
20. Evaluation of sludge toxicity in Tehran water treatment plants using bioassays, 2015.
21. An investigation into the remediation efficiency of Tetrachloroethylene contaminated water using Permeable Reactive Barrier (PRB) technology, 2014.
22. Survey of effective parameters on the combined sonoelectrochemical process efficiency for treatment of textile wastewater containing reactive dye in Yazdbaf factory, 2013.
23. Study on the efficiency of modified nanoporous graphene adsorbent for removal of 4-chlorophenol from aqueous solution, 2012.
24. Process optimization of electrochemically generated Fenton's reagent using graphite and platinum electrodes for COD and acidic dye removal from textile wastewater, 2011.
25. A Survey of physicochemical and biological quality of leachate & it effects on groundwater sources in landfill of Zanjan, 2008.
26. Assessment of Outdoor and Indoor Environmental Gamma Radiation in Zanjan-Iran 2006.
27. Study on background radiation levels in Zanjan, Iran, 2005.
